About me

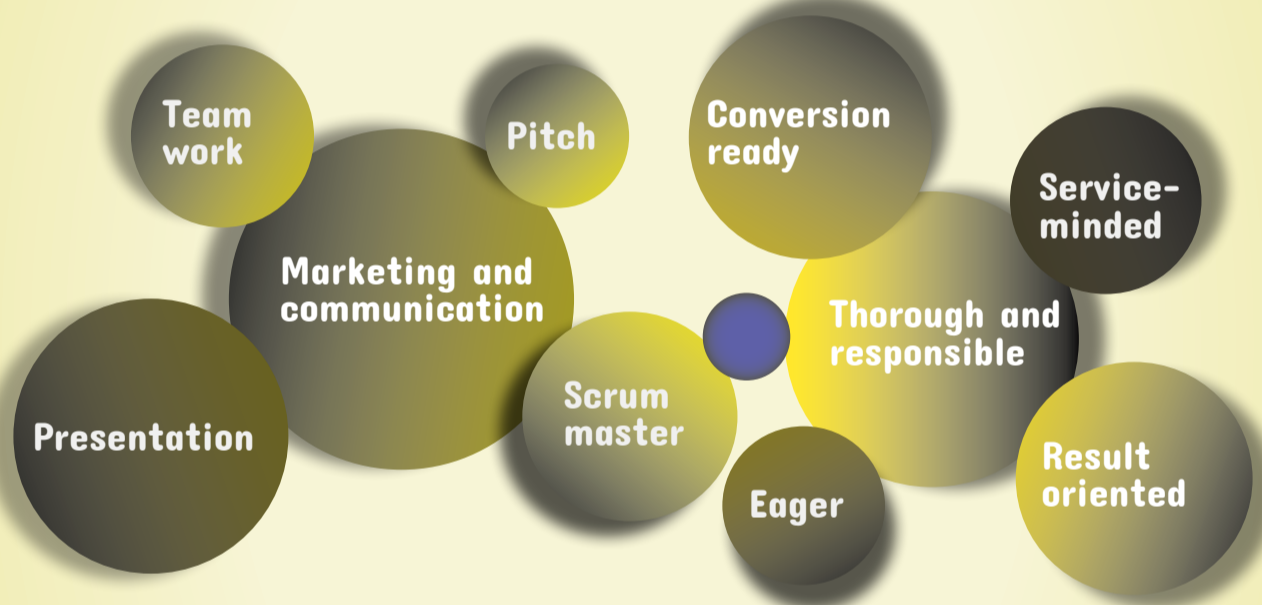

I am a trained multimedia designer with core competencies in UI, UX, Communication and Business. My elective was Design Across Borders, with Dutch students. I can develop concepts, elaborate and implement digital marketing.

I have always had a great interest in computers and the development of the Internet and really think it can be done better.

In parallel, I have worked with people in various jobs and can therefore both take the initiative, keep an overview and handle conflicts.

I see analysis benefits in working in teams, but often work faster alone.

COMPETENCES
